MOHAMMAD KAZIM

Full Stack Developer

mohammadkazimgoher@gmail.com | +91 93228 80051 | LinkedIn | GitHub

Professional Summary

MERN Stack Developer with hands-on experience developing production web applications using React.js, Next.js, Node.js, Express.js, MongoDB, TypeScript, and JavaScript. Experienced in end-to-end feature development, responsive user interfaces, RESTful API integration, authentication workflows, database management, third-party service integration, and frontend-backend debugging.

Technical Skills

Languages	:	JavaScript, TypeScript, Java, Python, SQL
Frontend	:	React.js, Next.js, ReactJS, Vite, Tailwind CSS, HTML5, CSS3
Backend	:	Node.js, Express.js, RESTful APIs, JWT Authentication
Databases	:	MongoDB, MongoDB Atlas, Mongoose, MySQL
Tools	:	Git, GitHub, Bitbucket, Postman, Swagger

Professional Experience

Pixonix Software Technology May 2026 – Present

Full Stack Developer Intern

- Developed features for **AivaHR (Production HRMS Platform)**, using React.js, Next.js, TypeScript, JavaScript, HTML, and CSS.
- Independently developed an end-to-end employee resignation and separation workflow, implementing frontend interfaces, workflow logic, and REST API integrations.
- Integrated REST APIs to retrieve, process, update, and display application data across frontend components.
- Debugged frontend-backend integration issues, investigated application errors, and performed manual testing to validate functionality and ensure reliable feature delivery.

Projects

StudyNotion – Full-Stack E-Learning Platform

React.js, Node.js, Express.js, MongoDB, JWT, Razorpay

- Developed a full-stack e-learning platform enabling students to browse available courses, purchase courses, and manage their online course enrollments.
- Implemented JWT-based user authentication and email OTP verification using Nodemailer to support secure account access and verification workflows.
- Designed and developed RESTful APIs for course management, user operations, ratings, and student enrollment functionality.
- Integrated Razorpay Test Mode for payment order creation and server-side payment signature verification, using MongoDB Atlas for persistent storage of application data.

Draft Arena – Tactical Anime Draft & Battle Game

Next.js, React 19, TypeScript, MongoDB, Mongoose

- Developed a turn-based 1v1 character drafting game featuring a 10-pick snake draft system, presenting three dynamic character candidates during each drafting turn.
- Implemented an intelligent CPU drafting algorithm with four difficulty levels (Easy, Normal, Hard, and Expert) to evaluate candidates and make character selections.
- Built a multi-dimensional battle simulation engine using five combat attributes: Taijutsu, Hax, Tactics, Speed Blitz, and Endurance.
- Developed REST API endpoints and MongoDB/Mongoose integration to support dynamic character retrieval and universe management.

Education

Bachelor of Engineering (B.E.) 2022 – 2026

GH Raisoni College of Engineering and Business Management, Jalgaon *Computer Science and Engineering*

Certifications

- Web Development Bootcamp – **CodeHelp (2026)**
- Artificial Intelligence (AI) for Management – **Indian Institute of Technology Madras (2026)**
